

Parents - if you're looking for a fun way to entertain your kids *and* help them learn, welcome to the **Color The Be Coloring Book**.

These coloring book pages provide a playful learning experience that combines a fun activity for kids – coloring the pages with crayons or colored pencils – with a teaching/learning activity that parents and kids can share.

As children begin to have all kinds of new experiences early in life, parents have an opportunity to teach them "life lessons" about good values, good manners and good behavior.

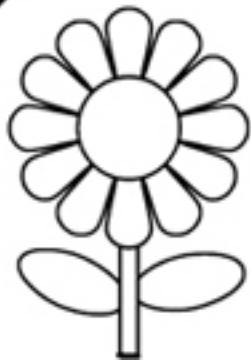

Many of these first lessons can be summarized in a phrase that starts with the word Be - for example - Be Honest, Be Kind, Be Polite, Be Respectful.

Learning new things can be fun if it includes a playful activity that helps to engage learners in the lesson. These Color The Be Coloring Book pages can assist parents with these lessons. While the children color the Be pages a parent can engage them in a conversation, using examples of real life situations, to help them understand what that Be means.

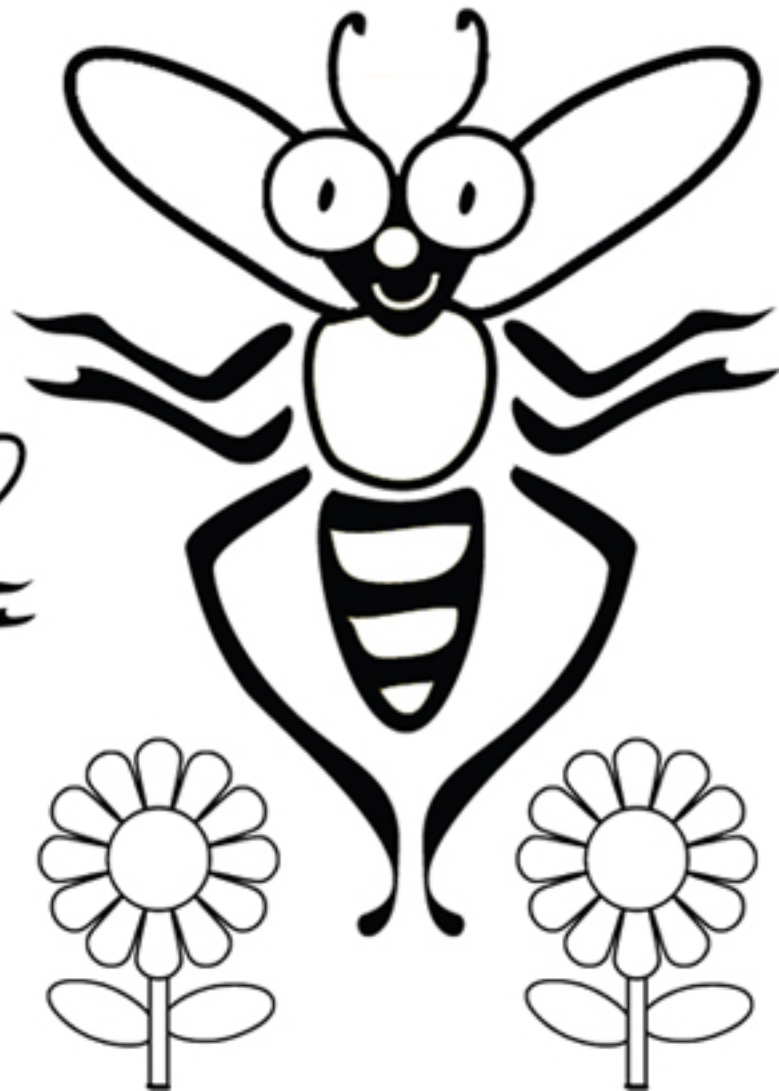

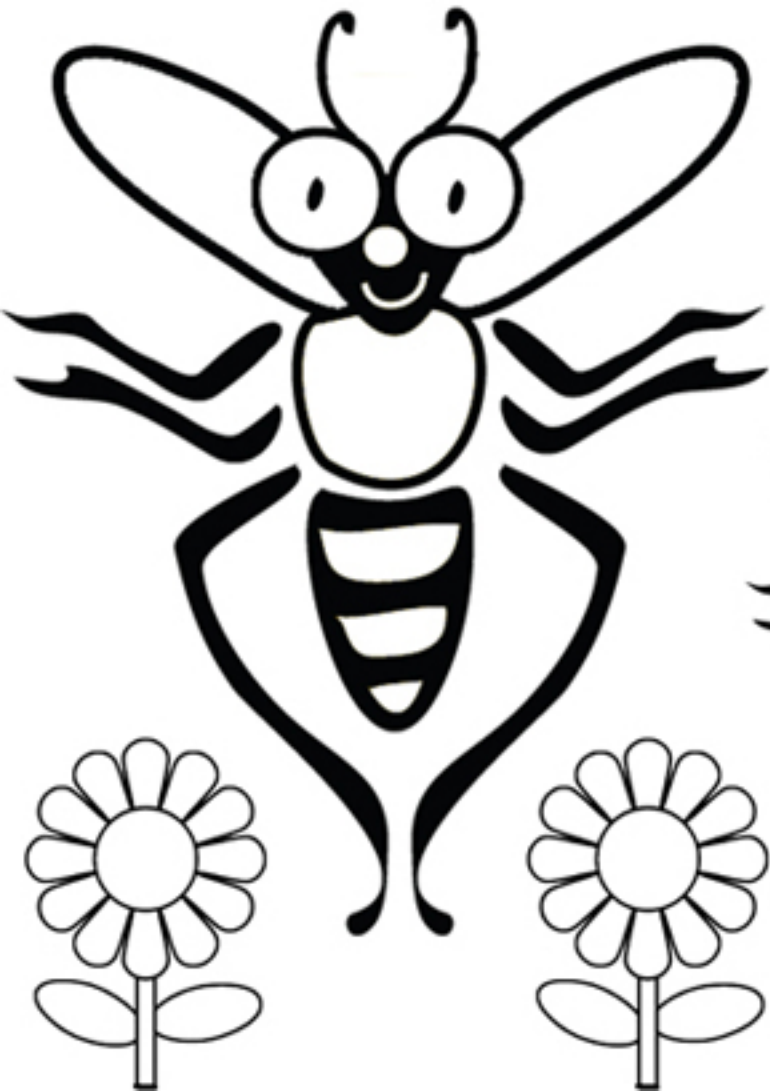

If you have a computer and an internet connection you can find the Color The Be Coloring Book online at <http://www.colorthebe.com>. The online pages can be colored many times over.

The Color The Be Coloring Book is designed by James Sullivan.
